

PMSHRI KENDRIYA VIDYALAYA NANGAL BHUR

NIPUN BHARAT

Under the Nipun Bharat project, various activities have been introduced to enhance foundational literacy and numeracy skills in primary students. These include Echo Reading and Choral Reading to improve fluency and teamwork, and Audio-Assisted Reading for better comprehension. Partner Reading and interactive story-telling sessions foster peer learning and creativity, while vocabulary and word recognition games expand language skills. Mathematical concepts are taught through engaging methods like face value cards and Magic Squares. Repeated reading helps in fluency, and activities like read-alouds and peer partner activities encourage collaborative learning. Parental involvement is promoted to support learning at home, and outdoor learning provides experiential educational opportunities.
