

Kendriya Vidyalaya Alhilal Cantt.
Report (July to November)
Art Education
Session - 2024-25

Art education plays a vital role in the development of students. It allows students to tap into their creativity and use various mediums to express their thoughts and emotions. They develop critical thinking skills as they make decisions about composition, color, and form. Creating art can be a therapeutic process, helping students cope with stress, anxiety, and other emotions. Art often involves collaboration, whether it's working on group projects or sharing ideas and feedback with peers. Through art education, students learn to communicate effectively, work together, and appreciate different perspectives.

In these few months, Art education focused on providing students practical skills in various artistic disciplines, such as painting, clay modeling, printing, Indigenous toy making and more. It aims to develop students' technical proficiency, creativity, and entrepreneurial skills to prepare them for careers in the arts and related fields.

Glimpse of few efforts are made in the above said direction:-

Hands on skill Training to students of Craft work
