Message from the Principal

What we expect from our children is what we create for them. Hence, the vision to which we align our efforts is the most important trigger for change and for leadership.

The era of education has taken a sharp bent,. Now every thing is goal oriented and our goal is globalised. Every individual effortlessly with one spirit and soul should work towards this. Then only we can form or constitute a global society in totality.

To create a global society which is very vibrant, we need the elements of the global society to be very vibrant, which in itself is defined. Hence the aim of education turns to be a nano level scheme entering into not only to the individual learner, but also to the intrinsic and micro qualities of the learner.

When having these facts in front of us, we the educationists are endorsed with great responsibility of preparing our children to this level. Hence let us work hand in hand to proclaim with great confidence that we will contribute to the same. Wish all of you the very best of life.

National Space Day

Day

National Space Day being celebrated on 23rd August being in the morning assembly. Rangoli competition held on the theme of space exploration.

READING PROMOTION WEEK

Under PMSHRI, Reading Promotion Week was conducted in the school.

The students were informed about the importance of reading. They were informed about why, how much, and what to read.

Apart from this competitions for students and workshop for teachers were conducted.
