

Information and Communication Technologies - ICT:

ICT enables students to access a vast pool of information. Online databases, e-books, and educational websites provide a wealth of knowledge at students' fingertips, and it promotes self-directed learning and encourages a curiosity-driven approach to education. Students have participated in activities organized by KVS, CBSE and other govt. organizations and secured good positions in like Cyber Olympiad, Digitally and Skilling Day etc.

Teachers use ICT tools to make the lesson interesting and more useful for children.

Students During 'Shiksha Saptah' students of class 9th and 10th participated and developed an animated story and displayed to primary students.
