Symmetry Masks: Create a colourful mask (animal or cartoon) that is perfectly symmetrical. Fold it in the middle to show the line of symmetry.

Section 4: Real-Life Application

The Kitchen Inventory: Visit the kitchen and check the weights of 5 different food packets (e.g., Rice, Pulse, Biscuits, Salt). Convert the weights from Kilograms to Grams. Find the total weight of all 5 items combined.

Be a Junior Banker: Ask your parents for a grocery bill. Check if the addition is correct. Note down the prices of 3 items and calculate how much you would pay if you bought double the quantity of those items.

Section 5: Reading / Research Task

Great Mathematician: Find out about the famous Indian mathematician Srinivasa Ramanujan. Write 5 interesting lines about his life and why the number 1729 is called the "Hardy-Ramanujan Number."

Section 6: Parent/Family Involvement Task Family Age Graph: Ask for the ages of all your family members (Grandparents, Parents, Siblings). Create a simple Bar Graph on a chart paper showing their ages. Who is the eldest? Who is the youngest? Calculate the age difference between them.
