

National Children's Science Congress (NCSC)

National Children's Science Congress (NCSC) is a nationwide Science Communication programme started in the year 1993. This programme inculcates the spirit of scientific study as well as analysing a problem scientifically.

5 projects were sent at district level which was held at Chandigarh and one project was selected for national level. Students participated with full enthusiasm and prepare their files, log book and charts very beautifully.

Project which was selected for national its topic was **SAY BYE TO BALLOONS!** And group members were **DHANISH IX A AND SANJANA IX B**

It was a group project in which they research on effect of using balloons in parties and function. They had also suggested the ways by which we can stop using balloons and what materials we can use in place of balloons.
